Transmitted herewith are Forms PTO/SB/08A and 08B providing material that may be relevant to the subject application. It is respectfully requested that these documents be considered by the Examiner and an initialed copy of the forms be returned to the undersigned. It is believed that this disclosure complies with the requirements of 37 CFR §§ 1.56, 1.97 and 1.98 and the MPEP § 609. If for some reason the Examiner considers otherwise, it is respectfully requested that the undersigned be called so that any deficiencies can be remedied.

Submission of these documents is consistent with the broadest interpretation of the duty of disclosure. In accordance with the rule for patent prosecution, such a submission is not to be construed as an admission that the information cited in the Second Supplemental Information Disclosure Statement is, or is considered to be, material to patentability as defined in §1.56. Applicants respectfully reserve the right to challenge a conclusion that any of the submitted material represents information constituting prior art to the present application or that the information that applicant has located would be of the type used by one of ordinary skill in the art in solving the problems addressed in the present application. The submission of these materials is consistent with the duty of disclosure and should not be interpreted as an indication that applicant has made a prior art search such that the Examiner should not undertake to conduct an independent prior art search.

Applicants submit material cited by a PTO Examiner in related U.S. Patent Application No. 09/428,836, entitled *High Speed Communication Over Local Coaxial Cable*, by common Assignee coaXmedia, Inc. The '836 application was incorporated by reference in the present application and claimed as a priority document. Note, U.S. Patent No. 6,178,161 has John Brian Terry as an inventor and is a co-inventor of the present case.

Dated: August 6, 2003
